SKILLS

JS / TypeScript / HTML5 / CSS3 / MongoDB / Vue / ReactJS / C#.NET / *and finally my greatest skill, for the many not listed here, is that <u>I will happily</u> open a book, or take a course, whatever it takes to <u>learn it</u>.*

WORK EXPERIENCE

Georgia Farm Bureau, Work from home   October 2018 to present
DS Programmer Analyst II
- Redesigned the entire frontend, decreasing site-wide load times by 1 or more seconds per page by adding object-oriented JS and refactoring legacy C#/Razor MVC code.
- Designed a new intranet site by translating UI/UX design wireframes into code while enhancing DX by producing high-quality, reusable components using well-tested libs ReactJS and SCSS.
- Enhanced company site-wide responsivity, cross-browser support, and accessibility compliance scores from C to an A+ per page by strictly adhering to the recommended guidelines and industry best practices.

microNovations LLC, Remote   July 2015 to 2018
IT Tech Support / Web designer (freelance)
- Built micronovations.com, a completely responsive SPA, designed with JS, HTML5, and CSS3.
- Installed and set up new computer/server hardware and software tailored to each client's unique organizational needs.
- Decreased the cost of the company website by 53% per quarter by redesigning and deploying the website to be statically hosted.

Software Engineering Senior Project, Milledgeville GA   January to May 2014
Software Engineer
- Designed and developed MedSCAN2014 a Barcode Medication Administration (BCMA) training software for the Georgia College Nursing Department.
- Interfaced with clients from planning to production to build software that meets their specific needs and expectations; demonstrating expertise in software development best practices.
